Teach your intern problem solving and communication skills that are valued in the workplace.

Support intern through small day-to-day interactions that add up to create a positive experience.

Foster intern ownership over project and promote self-initiative.

Design a project for an intern that is productive for you and educational for the intern, through a “project plan”.

This workshop has been developed from Akamai’s experience with 300+ interns over 15 years.

All Akamai mentors are invited to participate. Mentors will work with ISEE-Akamai staff and other mentors to plan a productive project for their intern. Mentors may also bring a colleague who is interested in becoming an Akamai mentor.

Fee Waivers and Travel Support: Funding from the Thirty Meter Telescope International Observatory and the National Science Foundation (AST#1347767) enables us to waive the registration fee and provide travel support for many participants (hotel accommodations at the Waikoloa Marriott, some meals, and airfare).

Application includes a request for fee waiver and travel support. We anticipate being able to accommodate many applicant requests. APPLY ONLINE by March 25. Notifications regarding application status will be sent out April 1st.

WORKSHOP AGENDA

FRIDAY, MAY 13
10:30AM - 7:00PM
Includes workshop sessions, time to begin developing an intern project plan, lunch, and dinner.

SATURDAY, MAY 14
8:30AM - 4:00PM
Includes workshop sessions, time to finalize your project plan, and lunch.

WORKSHOP INSTRUCTORS: Lisa Hunter, Jerome Shaw, Austin Barnes

Further information: see ISEE Mentor Program, and event webpage, or contact Lisa Hunter.

Workshop offered by ISEE in collaboration with the Thirty Meter Telescope International Observatory.
